## Green Bay Packaging Inc.

### Coated Products Operations

Wednesday, November 9, 2022

Dear Green Bay Packaging Customer,

With the recent paper mill closures and current supply shifting taking place in the industry, our paper prices are continuing to increase. We are confident in our supply position in paper liners now, through 2023 and beyond; however, that supply is coming with additional price escalation.

Effective with shipments as of December 9, 2022, we are implementing the following price increases:

Paper Facer / Paper Liner: 8%

Film Facer / Paper Liner: 4%

Paper Facer / Film Liner: 4%

Piggybacks: 8%

Coupon Products: 8%

These increases apply to both Green Bay Packaging and Citadel products. They are in addition to previously announced increases.

Supply has improved for most major label components. We recently lifted our Direct Thermal, Laser and Layflat monthly maximum supply limits. We have worked relentlessly to help you navigate through the last two and half years of supply chain challenges. We will continue to give you products and shipping dates that you can plan your business around. It is important to us that we remain the company you rely on for your critical label needs.
